

Royal Plastic Lockers is proud to participate in the Leadership in Energy and Environmental Design Green Building Rating System or (LEED).

Since its inception Royal Plastic Lockers has been a strong advocate of recycling and continues to recycle 95% of the waste generated by production. We also believe that recycling directly impacts people's lives and the health of our planet and are constantly exploring new methods to reduce waste.

The LEED Green Building Rating System for new Construction is a valuable tool that will improve the quality of a project and control how it will impact our environment. Royal Plastic Lockers are made from solid HDPE and contribute LEED points in the following areas.

MR Credit 2.1 and 2.2 Construction Waste Management Divert 50% or 75% From Disposal *1 Credit Point each or 2 Credit Points Total*

Royal Plastic Lockers are made from HDPE Solid Plastic a material which can be 100% Recycled. We manufacture a product that never needs to be repainted, will never rust or delaminate and with a 10 year warranty should never end up in a landfill.

MR Credit 4.1 and 4.2 Recycled Content

1 Credit Point each or 2 Credit Points Total

Royal Plastic Lockers are manufactured using material that contains 10%-75% Post Consumer Recycled HDPE.

MR Credit 5.1 and 5.2 Local Regional Material

1 Credit Point each or 2 Credit Points Total

All of the HDPE material used to produce Royal Plastic Lockers is manufactured and purchased from local suppliers within a 20-mile radius.
